

Adding Nested albums and photos to the Cool Running Gallery

1. Go to Photo Gallery for new/unsorted photos – this is the only album that allows anyone to load photos. Don't try to login – it is not the same as your messageboards login and only a few people have access to this function.

Don't bother with the add photos one just go to the right or use any untitled one there.

2. Go to create nested album

Leave blank if no caption is specified.
 Use filename as caption if no caption is specified.
 Use file creation date stamp as caption if no caption is specified.

If you have more than 5 photos select 10. I resize the photos first for fast upload when I have a heap. Otherwise the software will do it.

I hope this helps. I rushed to get it together so let me know if I have missed a step.

Cheers
